## HUT 8 INFRASTRUCTURE STACK

### CLOUD

#### Hut 8 Secure Cloud

Purpose-built Canadian cloud. All-inclusive subscription with compute, networking, backup, Kubernetes, and monitoring in one predictable CAD contract.

- KVM / Virtuozzo HCl
- OpenStack-native API
- BaaS, KaaS, SDN included
- ~30% lower TCO vs VCF

### COLOCATION

#### Hut 8 Rack

High-performance Canadian colocation for workloads that require physical control, predictable performance, and infrastructure reliability.

- Tier III-grade facilities
- N+1 & 2N power redundancy
- Hybrid-ready architecture
- 5 locations across Canada

### BACKUP

#### Hut 8 Restore

Secure, Canadian-based backup and data recovery — ensuring critical data can be restored quickly, confidently, and without foreign jurisdiction exposure.

- Managed backup as a service
- Granular restore capability
- Powered by Veeam & Zerto
- 100% Canadian residency

### DISASTER RECOVERY

#### Hut 8 Recover

Canadian disaster recovery service designed to restore full environments and resume operations during major outages with defined RTO/RPO and clear accountability.

- Defined RTO & RPO per workload
- Full environment restore
- DR runbook & testing included
- Single accountable partner

## HOLISTIC SOLUTIONS

### Cloud

Secure, scalable Canadian cloud infrastructure built on open standards. Designed for compliance, performance, and predictable cost.

- All-inclusive CAD-denominated subscription
- PIPEDA, OSFI E-21 & Protected B aligned
- Named account manager included

### Colocation

Enterprise-grade data centre space across five Canadian facilities. Ideal for regulated, performance-sensitive, and hybrid workloads requiring physical control.

- Customisable rack, cage & suite options
- Low-latency cross-connect & dark fibre
- Proactive infrastructure management

### Managed AI Solutions

NEW

End-to-end AI lifecycle management on Canadian data-resident compute. Hut 8 builds, deploys, and runs your entire AI stack, so you focus on outcomes, not operations.

- 60–90% cost reduction vs public API billing
- Fixed compute — no per-token metering
- Assess → Build → Manage lifecycle model

### Managed Backup & DR

Fully managed backup and disaster recovery. Defined recovery objectives, tested runbooks, and a single accountable Canadian partner.

- Automated backup with verified restores
- Documented RTO/RPO per workload
- Business continuity planning included

### Managed IT Services

Proactive IT management for Canadian organisations with lean internal teams. Monitoring, patching, incident response, and strategic planning under one engagement.

- 24/7 monitoring & incident response
- Quarterly strategic reviews
- Scalable to team size and complexity

### Network Services

High-performance connectivity across Hut 8's Canadian data centre network. Dark fibre, cross-connects, and private network services for low-latency enterprise workloads.

- Inter-site private connectivity
- Carrier-neutral colocation facilities
- BGP & redundant path management

## COMPLIANCE & CERTIFICATIONS

- ✓ PIPEDA
- ✓ BC PIPA
- ✓ PHIPA
- ✓ OSFI E-21
- ✓ Protected B
- ✓ SOC 2 Type II

**Your data stays in Canada. Your costs stay predictable.** All Hut 8 infrastructure is domiciled and operated in Canada. Our compliance posture satisfies PIPEDA, BC PIPA, PHIPA, OSFI E-21, and Protected B **simultaneously, by design.** And unlike hyperscale vendors, our pricing is transparent, CAD-denominated, and free of hidden add-ons; so your renewal looks like your contract.

## OUR LOCATIONS

Vancouver · BC

Vancouver Vault · BC

Kelowna · BC

Mississauga · ON

Vaughan · GTA

## Boutique Service. Enterprise Capability.

Every Hut 8 client has a named account manager who knows their environment, their compliance requirements, and their growth plans. That level of accountability is structurally impossible at a hyperscale operator; and it's how we work with every client, at every tier.
